Tools to make an impact and information for our next call

Secretary Zinke takes another monument off the review list due to arbitrary guidelines. Senator Cortez Masto (NV) visits Basin and Range, urges Sec. Zinke not to shrink or rescind national monuments.

*On Aug 8th, Senator Cortez Masto, her District Director Zach Zaragosa, and CLF's Jocelyn Torres toured Basin and Range National Monument. In addition to experiencing the beauty of the land, the Senator was able to listen to local supporters and local ranchers.*

Learn about how you can take action in the final weeks leading to the end of the review period.

## **Arbitrary Monument Review Draws to a Close**

Dear Friends Grassroots Network and supporters,

As Secretary of the Interior Zinke begins to wrap up the review period, we have seen how his actions have made this whole process a sham.

Sec. Zinke claims that monuments should be small in size but six days ago he issued a statement releasing Grand-Canyon Parashant from the review list, a monument of more than a million acres.

By taking Grand-Canyon Parashant off the list, there are now five monuments safe from reduction, including Upper Missouri River Breaks in his home state of Montana. [Click here](#) to read more about how the arbitrary rules leading this review period could impact the remaining monuments on the list.

Along with many other senators, Senator Cortez Masto of Nevada is an advocate for the protection of our monuments. In the field, on August 8th, the Senator visited the Basin and Range National Monument. She was at the monument from sunrise to sunset and was able to enjoy the scenic beauty of the region and talk to many locals. The Senator concluded her journey by releasing a [statement](#) that urges Sec. Zinke to protect the land. Use the information below to publicize her trip.

There are many ways to engage in the campaign. See below for ways to help.

Sincerely,

Sam Goldman  
Director of Strategic Engagement
